

HEATING CABLE FOR TERRARIUMS

4m | 15W 13683

5m | 25W 13684

7m | 50W 13685

9m | 80W 13686

220-240V 50/60Hz

Ideal source of warmth for an optimal supply to terrarium inhabitants. Encourages the well-being and supports digestion. More than one terrarium can be supplied with the warmth from one heating cable, depending on the size of surface area of the terrariums. Easy to install. Instructions for use and safety precautions: Completely unwrap the heating cable and check for any damage before use. The cable must not be superimposed during installation. Only use the heating cable on a flame retardant surface. The heating cable should only be used in combination with a thermostat. Not for use in water. Use a wet towel for cleaning. To protect the surface from damage, do not use any aggressive chemicals or scrubbing agents.
