MECHANICAL FILTRATION

Works as a pre-filter, retaining the existing waste water. For better efficiency, clean it with water from the aquarium once a month.

Recommended replacement  
**EVERY 3-5 MONTHS**

MECHANICAL FILTRATION

Works as a pre-filter, retaining the smallest residues in the water. For better efficiency, clean it with water from the aquarium once a month.

Recommended replacement  
**EVERY 3-5 MONTHS**

### CLEANWATER x2

CHEMICAL FILTRATION

Ultrafiltration which keeps the aquarium glass and surface clean for longer, helping to create ideal conditions for turtle. Reduces organic material, absorbs and retains phosphates, nitrates, nitrites and ammonia. Good results after two weeks. NOTE: in the case of turtle treatment, this filter media must be removed.

Recommended replacement  
**EVERY MONTH**

21960 - Coarse + Fine Foam

21829 - Cleanwater

The thin coating of the filter media acts as a MECHANICAL FILTER for fine particles, which must be removed after use and composted\*.
